

# Clogs & Slow Drains

Although a clogged drain may start as a nuisance, it can turn into a big issue if not addressed. Our professional drain team can clear even the toughest clogged sinks, bathtubs, showers, toilets and basement drains. *Before* they turn into bigger problems.

### Signs that your drain needs cleaned

- Sinks, tubs and showers drain slowly or backup
- Toilet is bubbling or gurgling
- Frequent clogs and bad odors
- Water puddles near sinks, showers, toilets or laundry area
- Dirty residue in basement tub or sink
- Basement is wet after rain showers
- Sewage backflow in basement

## Complete Residential & Commercial Services

We've been serving Ohioans with a full range of drain cleaning and clearing services since 1985. We also offer emergency services 24/7 to handle the unexpected.

- Grease Traps & FOG Compliance (state required)

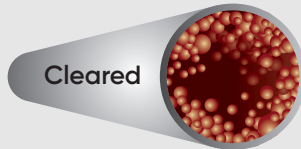

The Plumbing Source is an Approved, Licensed Contractor for the State of Ohio.

## Drain Clearing vs Drain Cleaning

In the world of plumbing, Clearing and Cleaning are two different things. Other plumbers may CLEAR your drain with a quick-fix for a special low price. As drain experts, the Plumbing Source prefers to CLEAN the drain so the clog does not come back.

**Drain Clearing** | Water flow is restored by punching a hole through the debris clogging your pipe, usually with a cable snake, plumbing auger or claw. These tools will cut up the clog and displace it, however, the remaining debris will eventually cake the pipe walls again and create another clog.

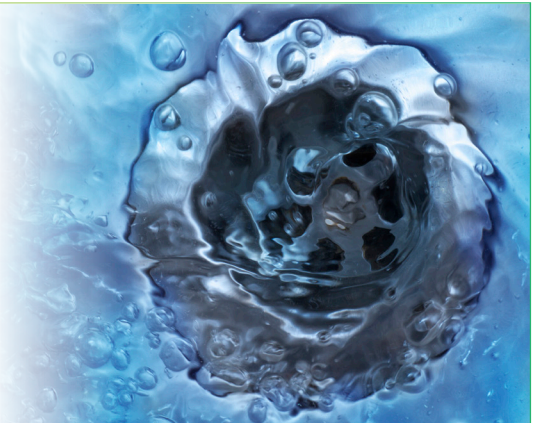

**Drain Cleaning** | **The Long-Lasting Solution**, drain cleaning fully flushes out your pipes with a powerful Hydro-Jetting tool. This method not only rids your pipe of the original clog debris, but scrubs years of build-up from your pipeline walls. With hydro-jetting, your pipelines will have longer lifespans and fewer stoppages.

### DIY Drain Maintenance

Once your drains have been thoroughly cleaned, it's important to prevent future clogging. For kitchens, dump bacon grease and other fats and oils into the trash, not the sink. For bathrooms, use simple hair strainers in your shower and bathtub drains to prevent hairballs. And for toilets, do NOT flush "flushable wipes" or tissues; those paper products simply do not break down like toilet paper and will ultimately help form clogs.

## The Plumbing Source offers unrivaled advantages

**The Plumbing Source does the job right. The first time.**

That's why we're the number one provider of drain cleaning in Cuyahoga County.

- 24/7 Emergency Response
